OBJECTIVES

Enthusiastic Computer Science student skilled in modern programming frameworks and system design principles. Experienced in designing RESTful APIs, optimizing algorithms, and implementing scalable software solutions. Eager to contribute technical skills to innovative and impactful projects.

SKILLS

Frontend: React.js, Blazor, HTML/CSS, JavaScript

Backend: Django, Flask, .NET Core, PostgreSQL, SQL, Django REST Framework

Others: RESTful APIs, Docker, NGINX

EDUCATION & CERTIFICATIONS

Infolink University College

B. S. in Computer Science

Hawassa

Expected Graduation, Jan 2026

A2SV | Africa To Silicon Valley

Mastering Data Structures & Algorithms

Remote

Expected completion, Dec 2025

ALX Software Engineering

12-month Software engineering foundation | Backend Specialization

Remote

Aug 2023 - Oct 2024

PROJECTS

MarketQ

- ◆ a B2B E-Commerce web application that aim to connect manufacturers with suppliers.
- ◆ Built the backend(API) with **Django REST Framework** with a complete API documentation.
- ◆ Built the frontend using **React and CSS for styling**.

Catch4Q

- ◆ Built and integrated a **web extension** to prevents students from cheating during exams at my college.

WeAskOnline

- ◆ a web API inspired by Quora.
- ◆ Collaborated on a 3-person team project. Built, tested, and documented the API.

Abronal Freelance

- ◆ a freelancing web app that aims to streamline the freelancing business in Ethiopia.

EXPERIENCE

Abronal Technologies PLC

FullStack Developer - Intern

Hawassa

July 2024 - Sep 2024

- ◆ Built a freelancing web app using .NET WebAPI with SQL Server for the backend, and Blazor WASM for the frontend. Which helped me master web development.
